

# Biology Research Opportunities

You, a scientist.

Getting involved with research is a great way to experience the scientific process, explore career opportunities, build your professional network, and discover something new.

## Doing undergraduate research

Check out the Biology web page to learn more about the different labs. Contact professors and look for open application announcements.

Work with professors and lab mates to collect and analyze data. Share your results at GREAT Day, science conferences, or in a paper.

Earn credit for your research. Completing three semesters of research in BIOL 299, 399, and 396 counts toward Biology major lab requirements.

**Apply Now!**

Research positions open every semester.

## CONTACT US

Read more about research opportunities on the Biology website and reach out to professors to find out more about opportunities.
